

Blessy A

React.js Front-End Developer | TypeScript | Redux Toolkit | Tailwind CSS

Chennai, Tamil Nadu, India | +91 8610074014 | blessya98@gmail.com | GitHub: github.com/buglessblessy

PROFESSIONAL SUMMARY

React.js Front-End Developer with 3+ years of experience (freelance and full-time) building scalable, responsive, user-facing web applications using React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3 and Tailwind CSS. Skilled in Redux Toolkit, Context API, RESTful API integration and component-driven development. Delivered up to 30% performance improvement and reduced duplicate code by ~25% through reusable component libraries. Experienced in Agile/Scrum teams, Cypress E2E testing, code reviews and AI-assisted development workflows (GitHub Copilot, Claude, ChatGPT, Cursor, Gemini).

KEY STRENGTHS

- End-to-End Ownership: Deliver features from requirements and design handoff through implementation, testing and release with minimal supervision.
- Scalable UI Architecture: Strong command of component-driven design, typed React code and predictable state management for large, multi-module applications.
- Performance Mindset: Diagnose rendering and loading bottlenecks and apply the right optimization technique rather than premature fixes.
- Code Quality Advocate: Review code, write automated tests and keep standards consistent so teams can ship faster with fewer regressions.
- Strong Collaborator: Communicate clearly with designers, backend engineers, product managers and clients to remove ambiguity early.
- Quick Learner: Pick up new libraries and tools fast and apply them productively in real projects.

TECHNICAL SKILLS

Frontend: React.js (React 19), JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Angular, Responsive Web Design, Cross-Browser Compatibility, Framer Motion

State & Architecture: Redux Toolkit, Context API, React Router, Flux Architecture, Component-Driven Design, Reusable Component Libraries

API Integration: RESTful APIs, CRUD Integration, Axios, Fetch API, JSON, Google Gemini API, Postman

Performance & Testing: Lazy Loading, Memoization, Code Splitting, Performance Optimization, Cypress (E2E), Jest, Debugging

Tools & DevOps: Git, GitHub, Docker, Vite, Webpack, npm, yarn, Netlify, VS Code, Agile/Scrum, Code Reviews

Backend (Working Knowledge): Node.js, Express.js, MongoDB

AI Tools: GitHub Copilot, Claude, ChatGPT, Cursor, Google Gemini (AI-assisted coding, debugging and code review)

PROFESSIONAL EXPERIENCE

React Frontend Developer | Anur Cloud Technologies, Chennai

August 2026 - Present

- Develop and maintain responsive, user-facing features for cloud-based SaaS products using React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3 and Tailwind CSS, collaborating with designers, backend engineers and product managers.
- Build reusable UI components and front-end libraries and integrate RESTful APIs with full CRUD functionality, ensuring a consistent, scalable architecture across modules.
- Manage application state with Redux Toolkit and Context API; optimize performance using lazy loading, memoization and code splitting.
- Contribute to code reviews in a Git/GitHub workflow and use AI-assisted tools to speed up feature delivery.
- Ensure responsive layouts and consistent behaviour across browsers and devices; resolve bugs raised by product and QA teams.
- Own assigned modules through to release and take part in Agile/Scrum planning, stand-ups and sprint reviews.

Junior Software Developer (React) RRIT Solutions, Chennai	August 2025 – August 2026
• Developed user-facing features for a SaaS project management platform using React.js, TypeScript, HTML5, CSS3 and Tailwind CSS, translating designs and wireframes into production-ready code. • Built reusable components and front-end libraries, integrated RESTful APIs with full CRUD functionality and validated API contracts with backend engineers, reducing duplicate code by ~25%. • Managed complex UI state with Redux Toolkit and Context API across multi-view workflows (authentication, projects, tasks), improving performance by up to 30% through lazy loading, memoization and code splitting. • Wrote Cypress end-to-end tests and led code reviews in a Git/GitHub workflow, using AI tools (GitHub Copilot, Claude, ChatGPT) to accelerate delivery. • Debugged production issues spanning UI state, API responses and browser compatibility, improving stability. • Delivered sprint commitments in an Agile/Scrum team, estimating tasks and coordinating with backend engineers and designers.	

Freelance Front-End Developer Self-Employed, Chennai	August 2023 – July 2025
• Designed and built responsive websites and web applications for clients using React.js, JavaScript, HTML5, CSS3 and Tailwind CSS, from requirements to deployment. • Created reusable, component-driven UIs and integrated third-party and custom REST APIs. • Handled bug fixes, usability improvements and feature enhancements after launch. • Managed client communication, timelines and releases independently using Git/GitHub and Netlify.	

PROJECTS

TaskFlow AI	github.com/buglessblessy
<i>React, TypeScript, Tailwind CSS, Redux Toolkit, Google Gemini API, Docker</i>	
• Built a full-stack Kanban platform with Redux Toolkit state management and a responsive drag-and-drop style task board UI. • Integrated the Google Gemini API for automated, AI-driven risk assessments; deployed with Docker. • Structured the app with reusable, typed components and centralized Redux Toolkit slices for predictable, maintainable state.	
AI Resume Builder	blessys-ai-resume-builder.netlify.app
<i>React 19, TypeScript, Tailwind CSS, AI API Integration</i>	
• Built and deployed an AI-powered ATS resume builder that generates resume content via AI APIs. • Implemented multi-step forms, client-side validation and real-time PDF preview with a responsive UI. • Designed the resume output to be ATS-friendly and deployed the app to production on Netlify.	
AI Chat Stream	ai-chat-stream.netlify.app
<i>React, Google Gemini API, Framer Motion</i>	
• Built a real-time AI chat app with token-level streaming responses, request cancellation and graceful error handling. • Designed a responsive, animated interface with Framer Motion for smooth streaming updates.	

EDUCATION

Master of Computer Applications (MCA) Bharathiar University, Coimbatore	2018 – 2020
CGPA: 8.1 / 10.0
